#### I—INTRODUCTION

**SCOPE OF MANUAL.** This instruction manual contains the specifications and information for installation and operation of the Kepco Model EMR 400K Switching Power Supply.

**DESCRIPTION.** The Model EMR 400K is a switching power supply with one principal output of (+)5 volt, two (2) auxiliary outputs of ( $\pm$ )12 volt, and one of (+)24 volt respectively. The power supply is constructed as a printed circuit board, enclosed by a perforated metal cover. The cover is mounted onto an aluminum base-plate, serving as the mounting surface and heatsink. Two (2) pin-header connectors (See Outline Drawing) are used for input/output connections.
